

Jakub Musiałek

Builder

He loves building companies and solutions. He is CEO of Pixel Technology (since 2004) and UnitDoseOne (since 2012), both companies acting in the field of medicine. He has gained extensive experience as:

- Radiology expert in the field of IT and image recognition for over 15 years
- Security expert for over 18 years
- Sales and marketing director in Pixel Technology for over 12 years
- Startup builder and startup organizer for over 5 years
- Medical device builder for over 3 years

As CEO in Pixel he has built with his business partners and the team the biggest radiology software provider in Poland, with over 200 installations at Polish hospitals.

As CEO in UnitDoseOne he is building right now the most advanced project - automatic hospital pharmacy. At present he is building a working prototype of this device and will certify it at Norbert Barlicki Memorial University Hospital in Lodz. UnitDoseOne solves problems related to errors in drugs distribution to patients by nurses and pharmacists.
